

MARTIN A. BRIGGS, PhD
Research Hydrologist, U.S. Geological Survey

USGS Branch of Geophysics
11 Sherman Place, Unit 5015 Storrs, CT 06269

Email: mbriggs@usgs.gov
Phone: 781.248.3074

Research Interests

- Surface water physical dynamics and quality
- Surface water/groundwater exchange and biogeochemical cycling
- Geophysical characterization of aquifer and permafrost dynamics

Education

- Syracuse University, Dept of Earth Sciences, Syracuse, New York 2012
Ph.D., Dissertation Title: *Using emerging methods to investigate stream and groundwater interaction at multiple spatial scales*
Advisor: L.K. Lautz
- Colorado School of Mines, Hydrologic Sciences and Eng. Prgm, Golden, Colorado 2009
M.S., Thesis Title: *Partitioning surface and hyporheic transient storage throughout a coastal stream network*
Advisor: M.N. Gooseff
- University of Massachusetts, Dept of Geosciences, Amherst, Massachusetts 2002
B.S., Geology *cum laude*

Awards and Honors

- DOE competitive grant (lead PI): A last line of defense: understanding unique coupled abiotic/biotic processes at upwelling groundwater interfaces. (9/16-8/19, \$600k total)
- NSF competitive grant (lead PI): “*Collaborative Research: Unlocking the Transient Storage Blackbox: Revealing the Role of Less-Mobile Porosity in Hyporheic Denitrification and Green House Gas Production*”, (7/2015-6/2019, \$540k total)
- NSF competitive grant (co-PI): “*Collaborative Research: Arctic Oases - How does the delayed release of winter discharge from aufeis affect the ecosystem structure and function of rivers?*”, (6/16-5/19)
- NRPP competitive grant (co-PI): “*A hydrological framework to improve precision of vital signs metrics in the Appalachian highlands?*”, (2/17-1/20)
- CT-IWR completeive grants (n=2, co-PI): “*Integrating fine-scale field measurements with regional groundwater models to predict legacy nitrogen in Long Island Sound watersheds*”; “*Evaluation of created thermal refugia in streams as a climate adaptation strategy for fish populations experiencing thermal stress*”, (6/17-5/19)
- Exceptional rating, USGS performance review FY2013, FY2014, FY2015, FY2016
- 2016 Editors’ Citation for Excellence in Refereeing for *Journal of Sustainable Water in the Built Environment*
- 2013 Editors’ Citation for Excellence in Refereeing for *Water Resources Research*
- Syracuse University College of Arts and Sciences Doctoral Dissertation Prize, 2012
- NSF competitive grant (lead PI): East Asia and Pacific Summer Institutes Fellowship Program, (summer 2011)

Professional Associations

- American Geophysical Union 2006 – present
- Geological Society of America 2009 – present

Hydrology Research Experience

Research Hydrologist 2012 – present

USGS (GS-12) Office of Groundwater, Branch of Geophysics, Storrs, Connecticut

Supervisor: OGW Branch Chief, John Lane, phone: 860-487-7402

We work on a wide range of pressing hydrological issues around the world. The Branch of Geophysics supports regional Water Science Centers when hydro-geophysical tools and training are required, and we collaborate with academic institutions on pioneering water research. Central missions at the Branch are training and method development, so we travel around the country giving workshops and field testing new methods. Examples of recent projects are:

- Repeat expeditions to Alaska (2012,14,16) as field team leader to characterize permafrost extent and lake budgets using seismic, electrical, radar, thermal and mechanical methods, and subsequent modeling of unsaturated permafrost dynamics.
- Innovative characterization of endangered shellfish and native brook trout habitat in a variety of systems, particularly in the context of groundwater discharge to surface water.
- Modeling dual-domain mass transfer of uranium contaminated groundwater in Colorado involving the novel use of combined electrical and chemical methods.
- Installation of sea water intrusion monitoring network (2013, 16) on a remote Pacific atoll to monitor the effects of climate change and sea level rise on atoll fresh water
- Planning and creating teaching materials for ongoing USGS training workshops on surface water/groundwater exchange and geophysical characterization

Research Assistant 2009 – 2012

Syracuse University, Syracuse, New York

- Used modified fiber-optic Distributed Temperature Sensing (DTS) technology combined with redox sensitive tracer injections and geochemical analysis to determine spatial and temporal patterns of surface water/groundwater interaction and biogeochemical reactivity in streams.

Research Assistant 2006 – 2009

Colorado School of Mines, Golden, Colorado

- Investigated the natural controls on nitrogen retention within the Ipswich River basin, Massachusetts using conservative tracer and labeled isotopic tracer injections, along with novel approaches to 1-D solute transport modeling and nonlinear regression software.

Research Intern 2005

University of California, Santa Cruz, CA

- Assisted in research on surface water quality controls within the Pajaro River Basin.

Service

Associate Editor, Hydrological Processes 2016-present

NSF-HS proposal review panel spring 2016

AGU Hydrogeophysics Committee 2015-present

Engineers without borders local CT outreach events 2016-present

Mentoring several undergraduate summer interns, annually 2013-present

Convening multiple national conference topical sessions, annually 2012-present

Connecticut community college outreach events 2013-present

Technical Skills

- Proficient: Matlab, MODFLOW, MT3D, SUTRA-ICE, ArcMap (GIS), OTIS, UCODE
- Fiber-optic distributed temperature sensing (DTS) technology
- Steam gauging (ADV, ADCP, Marsh-McBirney, tracer dilution)
- Stream tracers, conservative and reactive, including the resazurine “smart tracer”
- Aquifer testing (hydraulic slug and pumping tests)
- Electrical geophysical methods (electromagnetic, electrical resistivity, seismic, etc.)
- Surveying
- Ion chromatography
- Inductively coupled plasma optical emission spectrometry
- Labeled isotopic sampling (gas and water)
- Organizing and training large, diverse field teams
- Wilderness First Aid, CPR, and USGS Wildlife Defense

Teaching/Mentoring Experience

Adjunct Faculty

University of Connecticut Civil Engineering 2012-present
UCONN graduate independent study “SW/GW interactions literature” (3 cr) Fall 2013

Graduate Committee Member (*indicates primary advisor)

Farzaneh Mahmood Poor Dehkord*, PhD Student, UConn 2015-present
Janet Barclay, PhD Student, UConn 2015-present
Kristen McSwain, PhD Student, North Carolina State University 2013-present
Sean Buckley, MS Student, UConn 2013-2014
PhD dissertation examiner, Dawit Berhane, The University of Sydney 2014

NSF GRIP internship supervisor

Erin Seybold, PhD Candidate, Duke University 2016-17

Teaching Assistant

Environmental Geology, Syracuse University, Syracuse, NY spring 2011

Guest Lecturer

Groundwater Hydrology, Wells College, Aurora, NY 2012
Biogeochemistry, SUNY Environmental Science and Forestry, Syracuse, NY 2011
Contaminant Hydrogeology, Syracuse University, Syracuse, NY 2011
Seminar in Hydrological and Biogeochemical Processes, SUNY-ESF, Syracuse NY 2011
Advanced Hydrologic Field Methods, Colorado School of Mines, Golden, CO 2009
Subsurface Contaminant Transport, Colorado School of Mines, Golden, CO 2009
Organizer and host of SU Earth Sciences Graduate Seminar spring 2010-spring 2012

Training Instructor

USGS Field Techniques for GW/SW Exchange (5 day), Cape Cod, MA 2014,16
USGS GW/SW Interactions (5 day,), Denver, CO 2013,15,17
CUAHSI Techniques for GW/SW Investigations Workshop 2016
USGS National Groundwater Meeting Workshops 2012,16
Technical training in Support of Native American Relations (TESNAR),
Swinomish Reservation, WA 2012
