Do you want to learn how to build infrastructure, manage construction projects from design to execution, and take part in hands-on learning activities that impart real-world knowledge? Consider a minor in Construction Engineering and Management.

The Department of Civil and Environmental Engineering is pleased to offer a minor that covers the entire spectrum of construction management, preparing students for jobs in a competitive field. You’ll learn about project management, scheduling, life-cycle cost analysis, construction engineering principles, and project financing. You’ll apply lessons learned in the classroom to real-world projects that will prepare you for an exciting career.

**COURSEWORK (15 credits required)**

**Required Course:**
- CE 3220 Principles of Construction I

**Elective Courses (Choose Four):**
- CE 4210 Operations Research in Civil and Environmental Engineering
- CE 4220 Principles of Construction II
- BADM 3104 Operations Management
- BADM 3603 Project Management and Planning
- BADM 3720 The Legal and Ethical Environment of Business
- BADM 3730 Financial Management
- AH 3275 Hazardous Waste Operations and Emergency Response (HAZWOPER)

**INTERESTED?**

Contact your advisor. You can register for **Principles of Construction I** for the fall semester and begin planning your other coursework immediately.
