

Issues at the Intersection of
**ENGINEERING &
HUMAN RIGHTS**

A Symposium

NOVEMBER 18-19

Washington, D.C.

Engineering touches every aspect of human life, and as a result, engineers have the power to help alleviate or exacerbate societal harms

Join experts in the fields of human rights and engineering to discuss how engineers can promote the realization of human rights and how human rights can provide a valuable framework for addressing engineering challenges, including related to public health, equity, and privacy.

Co-hosted by:

**NATIONAL ACADEMY
OF ENGINEERING®**

Cultural, Ethical, Social, and Environmental
Responsibility in Engineering Program

COMMITTEE ON
HUMAN RIGHTS

National Academy of Sciences
National Academy of Engineering
National Academy of Medicine

LOCATION

National Academy of Sciences Building
2101 Constitution Ave NW
Washington DC 20418

KEY THEMES

To be addressed by expert panelists and through participatory exercise sessions:

- Bridging Human Rights and Engineering
- Human Rights and Engineering Education
- Addressing Inequities in Public Infrastructure
- Participation and Inclusive Collaboration in Engineering Decision-Making
- Engineering to Combat Climate Vulnerability
- Seeking Justice and Remediating Human Rights Harms
- Integrating Human Rights Principles into Systems and Product Design
